PIYUSH GOEL

Delhi, India | piyushgoel811@gmail.com | +91 7503433132 | linkedin.com/in/piyush-goel-2808
Languages: English (Professional Working) | Hindi (Native)

PROFESSIONAL SUMMARY

Software Developer and AI Engineer equipped with a solid foundation in computer science and AI pipeline development. Demonstrated project experience using Java, Python, Spring Boot, and Vector Databases to create secure, concurrent backend systems and intelligent search/RAG features. Fast learner adaptable to both core software engineering and AI team needs.

EDUCATION

IIT Madras Remote
BS in Data Science | CGPA: 8.0 *2025 – Ongoing (Flexible Track)*

BVICAM, GGSIPU Delhi, India
Master of Computer Applications (MCA) | CGPA: 8.5 *2025 – 2027*

IITM, GGSIPU Delhi, India
Bachelor of Computer Applications (BCA) | CGPA: 8.7 *2021 – 2024*

SKILLS

Programming Languages: Python, Java, SQL
AI/ML & Data Science: Generative AI, RAG, LangChain, LLMs (GPT, Groq, Gemini), ChromaDB,Prompt Engineering
Backend & Frameworks: Spring Boot, RESTful APIs, High-Concurrency Architectures, JWT Authentication
Tools & Databases: Git, MySQL, Vector DBMS, Agile Methodologies

PROJECTS

DocuMind RAG – Contextual Generative AI Application 2026
Technology Used: Python, Vector Stores (ChromaDB), LLM APIs, Embeddings

- Architected a full-stack RAG pipeline to perform contextual, hallucination-free querying over unstructured enterprise documents, directly addressing context-retrieval latency and accuracy.
- Engineered modular data ingestion, cleaning, and tokenization workflows (PyMuPDF, python-docx) integrated with dense vector embeddings persisted in ChromaDB for highly relevant similarity search.
- Built an adaptive orchestration layer to dynamically route and optimize LLM inference across multiple foundation models (Gemini, Groq, Ollama), implementing advanced prompt engineering and cost-efficient execution.

Campus Connect – Scalable Production Backend Jan 2026 – Present
Technology Used: Java, Spring Boot, RESTful APIs, JWT, Git

- Engineered a high-concurrency, scalable backend infrastructure designed to support production-ready API integration, handling real-time data processing and secure authentication for 250+ active users.
- Optimized database query performance and computational pipelines to ensure low-latency system reliability and observability, maintaining strict version control across 30+ production commits.

Gym Management System – Scalable Web Application 2024
Technology Used: Java, Spring Boot, MySQL, RESTful APIs

- Contributed to a group-developed Gym Management System by implementing secure authentication and role-based access control (RBAC) across administrative and member portals.

EXPERIENCE

Vodafone Idea Foundation Remote
Data Analytics Intern *Jul 2024 – Aug 2024*

- Executed end-to-end data preprocessing, cleaning, and structural transformation on large-scale raw datasets to prepare inputs for downstream computational and predictive pipelines.

Infosys Delhi, India
Technology Stack Intern *May 2024 – July 2024*

- Collaborated with cross-functional engineering teams to develop and integrate scalable enterprise software features, gaining hands-on exposure to production-grade system architectures.
- Participated in algorithm optimization, peer code reviews, and agile workflows to ensure reliable software deployment and adherence to industry-standard engineering practices.

CERTIFICATIONS AND ACTIVITIES

Leadership & Activities: Public Relations Head – IEEE BVICAM | NPTEL Star (IIT Kanpur)
Hobbies: Badminton,Geopolitics & Current Affairs
